Now we can go to settings page and take a look on it.

Cookies Lock Settings

Secret url:
To set cookie go to: <http://taanab.com/269099e>

Secret Key:

Secret Value:

here is random preinstalled settings

you can change it to your own value and save it

Cookies Lock Settings

Settings saved.

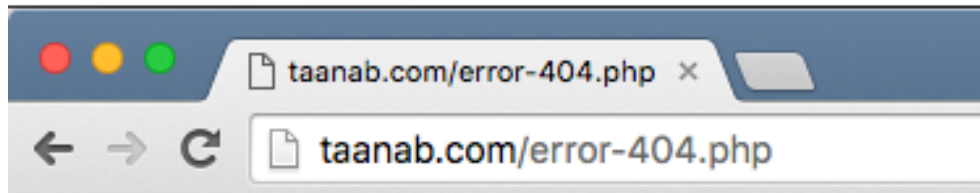

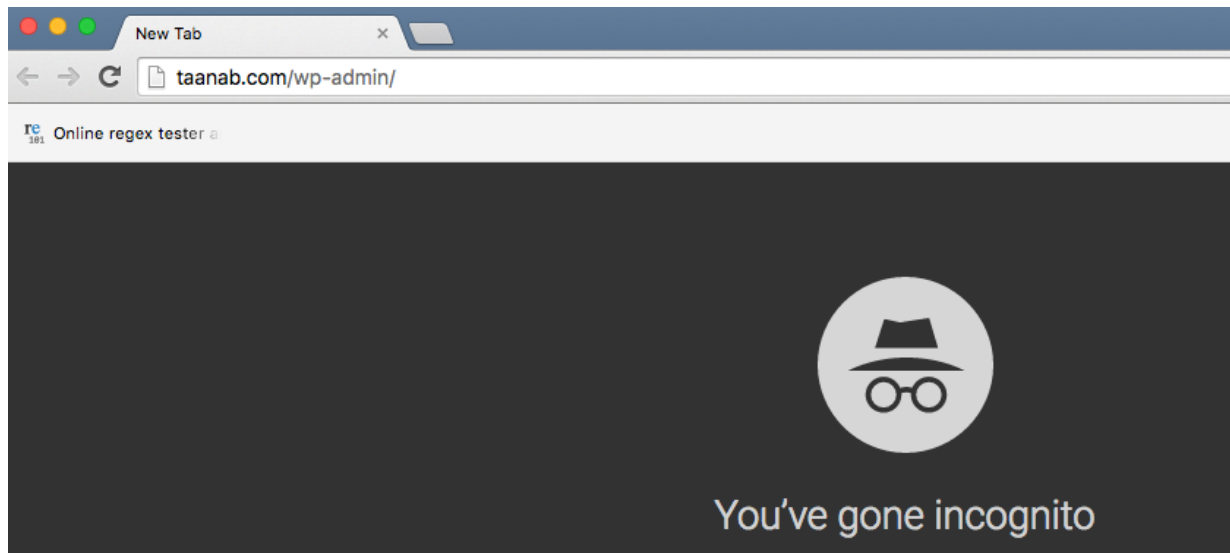

Secret url:
To set cookie go to: <http://taanab.com/myownurl>

Secret Key:

Secret Value:

And now we can see how it works, let's go to my website example:

I gonna open this link taanab.com/wp-admin/ in new incognito window and I will be forwarded to 404 Page

On this step you can create your own page with this url.

And in the same window I can test my cookies link, which one will allow me to set cookies for new web browser.

<http://taanab.com/myownurl>

Our current session not will be destroyed, until you will be logged in.

Lets check it and now I gonna do logout

And I got <http://taanab.com/error-404.php>

But I can use <http://taanab.com/myownurl> link, which I created before, and easy can go back to admin panel.
